Deep Web Research and Discovery Resources 2020

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director
Virtual Private Library

Bots, Blogs and News Aggregators 2020 (http://www.BotsBlogs.com/) is a keynote presentation that I have been delivering over the last several years, and much of my information comes from the extensive research that I have completed over the years into the “invisible” or what I like to call the “deep” web. The Deep Web covers somewhere in the vicinity of trillions upon trillions of pages of information located through the world wide web in various files and formats that the current search engines on the Internet either cannot find or have difficulty accessing. The current search engines find hundreds of billions of pages at the present time of this writing. This report constantly updated at http://DeepWeb.us/.

In the last several years, some of the more comprehensive search engines have written algorithms to search the deeper portions of the world wide web by attempting to find files such as .pdf, .doc, .xls, ppt, .ps. and others. These files are predominately used by businesses to communicate their information within their organization or to disseminate information to the external world from their organization. Searching for this information using deeper search techniques and the latest algorithms allows researchers to obtain a vast amount of corporate information that was previously unavailable or inaccessible. Research has also shown that even deeper information can be obtained from these files by searching and accessing the “properties” information on these files!

This report and guide is designed to give you the resources you need to better understand your search through the currently available web to find those key sources of information nuggets only found by utilizing how to search the “deep web”.
This Deep Web Research and Discovery Resources 2020 report and guide is divided into the following sections:

- Articles, Papers, Forums, Audios and Videos
- Cross Database Articles
- Cross Database Search Services
- Cross Database Search Tools
- Peer to Peer, File Sharing, Grid/Matrix Search Engines
- Presentations
- Resources - Deep Web Research
- Resources - Semantic Web Research
- Bot and Intelligent Agent Research Resources and Sites
- Subject Tracer Information Blogs

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet’s first Subject Tracer™ Information Blogs:
