Additional Business Intelligence Resources: http://www.BIResources.info/

Date: July 1, 2026

Contact and Developer: Marcus P. Zillman, M.S., A.M.H.A.

Description: The Social Buzz AI Agent 2026 (SBAIA)) is a highly anticipated structured artificial intelligence search agent utilizing cloud computing with a grid of tens of thousands computers within the cloud. Our unique distributed architecture stitches together computers from all around the world to deliver exceptional AI Agent crawling performance. We currently have anticipated the capability to crawl billions of pages per day. The niched part of our project is to have available current awareness curated business and social intelligence information with regards to the various significant and not so significant (where many memes are born) social communities and related applications and sites. The Social Buzz AI Agent 2026 will give the small entrepreneurial startup, medium size business and large scale enterprise business networks the capability to receive current awareness happenings in the social community environs and to use that business intelligence to make decisions that will aid the overall performance and direction of the business in today's new and exponentially growing social economy using the latest AI.

The project will be headed up by Marcus P. Zillman, M.S., A.M.H.A. Marcus P. Zillman, M.S., A.M.H.A.; Executive Director of the Virtual Private Library™, Creator/Founder BotSpot.com and Executive Producer of BOT2000 and BOT2001 conferences for internet.com; has designed, developed and created online databases and information retrieval access scripts for the last thirty years. He is a benefactor member of the Internet Society, participant in the IETF Users Services Working Group and was selected to participate in the U.S. Government's Open Meeting Electronic Forum as a non-governmental expert on information retrieval and access. He is the Creator/Founder of BotSpot.com® "The Spot for all Bots and Intelligent Agents on the Net" one of the Internet's most awarded sites (over 400 awards) and is considered the definitive resource for Bots, Intelligent Agents and Artificial Intelligence on the Internet. PC Magazine selected it as one of the Top 100 Best Web Sites on the Internet in 1998 as well as selected by NetGuide as the Top 10 of all Internet sites during all of 1998. BotSpot® was acquired by internet.com LLC in January 1999. Currently Mr. Zillman is Executive Director of the Virtual Private Library™ creators of 54 Subject Tracer™ Information Bot Blogs, writes, consults, tutors and delivers keynote speeches on The Future of the Internet: eCommerce Security, Cloud Computing, HTML5, IPV6, Big Data and AI. He has been a member of American Society for Information Science & Technology, Association of Computing Machinery, IEEE Computer Society, The Society for the Study of Artificial Intelligence and the Simulation of Behaviour, American Association for Artificial Intelligence, P2P Working Group and the gPulp Working Group. He has also authored over 100 professional Internet MiniGuides, Manuals and White Papers that have been downloaded over 15 million times, hosted and produced over 160 Internet-101 weekly television shows, writes a monthly column on the latest Internet Resources as well as publishes a monthly award winning newsletter titled Awareness Watch™.
